

Free Trade Agreement (FTA) Analyzer

ONESOURCE® FTA Analyzer is a decision-making and analytics tool, optimised to deliver trade professionals with up-to-the-day reports detailing which sourcing countries, trade lanes, and trade agreements provide the most favourable return on investment, based on their company-specific trade data.

Duty optimisation is essential for supply chain success

Unprecedented supply chain disruptions have impacted many companies causing them to rethink their traditional utilisation of FTAs. As new FTAs such as RCEP continue to be signed, companies that fail to monitor new FTA opportunities could potentially end up paying millions of dollars extra per year in duties.

Having an effective duty optimisation strategy – one that includes capitalising on FTA benefits as they continue to change - is critical to delivering optimised landed costs.

Key features

- ✓ **FTA Optimisation Reports**
 - Ranked reports on trade lanes, products, countries, and FTAs that can maximise savings
- ✓ **Unlimited FTA Analysis**
 - Avoid spending many hours manually researching trade lane FTA opportunities for individual products
 - With unlimited searches available on demand, gain operational efficiency and access the FTA intelligence you need, when you need it
- ✓ **Rely on market leading global trade content**
 - 500+ global FTAs monitored for changes to eligibility for member countries and preferential rates of origin
 - 200+ Global Trade Content analysts speaking over 60 languages and covering regulatory data for 220+ countries and territories
 - A content validation process that regularly corresponds with government agencies in addressing issues with regulatory information

Key benefits

Delivers easily consumed information and reports specific to your trade lane data, leading to high ROI decisions on cost savings or more competitive product prices in customer markets.

- ✓ Create meaningful rationales for trade lane decisions that can be “sold” to leadership
- ✓ Prioritise the most impactful duty optimisation opportunities to maximise savings
- ✓ Stay alert to changes by revalidating and re-optimising your supply chain and making timely adjustments

FTA Analyzer at a glance

CHALLENGES	RESULTS
High volume of products	Rely on simple trade lane data uploads that drive FTA analysis
Shipping to many countries	Ensure accurate FTA duty rate content
Multiple FTAs available, with more continuing to be signed each year	Rely on 500+ FTAs monitored for changes
Insufficient time to analyse and evaluate the best FTAs to maximise savings and operational efficiency	Quickly identify opportunities for FTA savings

FTA Analyzer transforms a resource-intensive analysis process and provides many-to-many analysis between countries and FTAs supported in the **ONESOURCE Global Trade Content** database

A new supply chain era **has already begun**

New FTAs, trade wars, the pandemic, and other geopolitical events have triggered companies to diversify their supply chains, changing the FTA landscape.

FTA Analyzer is here to navigate you through these complexities and find the best opportunities for your company. Unlock your company's potential and open the door to the new supply chain era today.

Start by speaking to Thomson Reuters professionals - we will be able to guide you by:

- Determining your needs and requirements
- Sharing how automated analysis can rapidly identify FTA savings in your supply chain
